

OUTDOOR SHADING

FARZ offers innovative solar protection and control solutions to transform outdoor areas into cooler, more functional and comfortable spaces. Our range of awnings and curtains combines design, technology and quality: from shade for gardens and terraces to improved privacy and thermal insulation for windows, balconies and skylights.

With manual and automated options, high-performance materials and elegant designs, every FARZ awning is designed to provide comfort, protection and style.

Find the ideal solution for your space and enjoy outdoor living without limits.

RETRACTABLE AWNING

Enjoy your outdoor spaces with protection from sun exposure. Designed for gardens, terraces and pools, this awning offers an elegant, functional way to create cooler, more comfortable environments.

Manual or automated opening lets you choose refreshing shade or open sky whenever you wish. Versatility, style and comfort that extend outdoors.

TECHNICAL FEATURES

Wind resistance*

30, 40 and 50 km/h.

*Wind resistance depends on awning projection.

Recommended spaces

Homes, balconies, patios and restaurants.

OUTDOOR CURTAINS

A collection of lightweight, soft acrylic fabrics designed for outdoor curtains. The fibres filter sunlight efficiently, providing privacy without losing brightness. They offer excellent colour resistance to UV rays, with a colourfastness rating of 7-8/8, and resist mould, stains and dirt. Made from 100% acrylic fabric, they incorporate 50% recycled Raytent fabric, combining durability, performance and a more conscious approach.

DESIGNED TO MOVE YOUR WAY

Enjoy outdoor freedom.

Automated FARZ awnings adapt to the weather and the moment, providing shade, protection and comfort with intelligent technology that works for you.

FARZ quality and design now feature Somfy, a leader in automation technology.

Move towards total comfort.

Translation and specification notes

This English edition was prepared by HB Blinds from the supplied Spanish FARZ document. It is not an official English manufacturer publication. Photographs, model names, values and units are retained. Supplier performance and certification claims are translated, not independently verified. Confirm suitability, installation, current warranties and model-specific limits before ordering. The Spanish source remains available on the website.

Source inconsistency: the 90-degree awning feature section states adjustment from 45 to 90 degrees. The tilt-angle page states 0 to 45 degrees and a 90-degree maximum for operation. All original values are retained; confirm the intended adjustment range with FARZ. Wind ratings apply only under the supplier's specified configuration and installation conditions.
