

PERGOLA

VERONA PERGOLA

Verona pergolas are an ideal solution for transforming your porch, terrace or garden into a functional, sophisticated space throughout the year.

Made from a premium aluminium, magnesium and titanium alloy, they combine strength and durability with modern design. An adjustable-louvre roof regulates incoming light and provides protection from rain or wind, creating a comfortable environment.

Make the most of your outdoor space with Verona pergolas, creating cool, bright settings for any time of day and any weather.

BENEFITS

The Verona pergola stands out for its innovative design, strength and functionality. Made from high-quality aluminium alloy, the supplier describes it as resistant to moisture, termites and corrosion, with a service life of up to 50 years and minimal maintenance. Its resistance to fire and impacts offers safety and durability.

Its versatile, modern appearance suits different decorative and architectural styles, from residential to commercial projects. Efficient installation and its environmental attributes make it a solution for those seeking elegance, performance and outdoor sustainability.

FARZ

SHADE IS OUR SPECIALTY

Translation and specification notes

This English edition was prepared by HB Blinds from the supplied Spanish FARZ document. It is not an official English manufacturer publication. Photographs, model names, values and units are retained. Supplier performance and certification claims are translated, not independently verified. Confirm suitability, installation, current warranties and model-specific limits before ordering. The Spanish source remains available on the website.

Source inconsistency: the size heading says "two sizes" but lists three: 4 x 3 m, 4 x 6 m and 4 x 8 m. This translation labels them "sizes listed" without changing any dimension. Confirm availability with FARZ.
