

SHADES / ESSENZA FABRIC COLLECTION

ESSENZA FABRIC COLLECTION

SHADES

This sample collection presents fabrics for different styles and needs. From classic elegance to modern design, our fabric options are ideal for enhancing any space.

We offer a wide range of colours, from neutral shades to vibrant tones.

ROLLER SHADES

FARZ roller shades combine modern design, functionality, versatility and easy installation. Ideal for homes and commercial spaces, their single fabric panel provides efficient light and privacy control. A wide range of textiles, transparency levels and colours suits different environments.

Some of their benefits:

- Block or diffuse light to suit your needs
- Thermal insulation for greater comfort in every season
- Manual or motorised operation for greater convenience
- Elegant, minimalist design, easy to install and suited to any space
- Discover FARZ roller shades with high quality and reliable delivery times.

BENEFITS OF ROLLER SHADES

Versatility

Available in many colours, patterns and opacity levels to personalise each space.

Light control

Precise light control, from fully open to completely closed.

Ease of use

Easy operation with a cord, chain or remote control.

Sound reduction

Reduction of excess noise.

SHEER ELEGANCE

These shades stand out for their versatility and functionality, offering simple, precise light and privacy control.

Alternating opaque and sheer bands overlap to adjust illumination, privacy and visibility, creating the right atmosphere for every moment.

SHEER ELEGANCE FEATURES

Banded structure

Alternating opaque and sheer bands provide precise control of light and privacy.

Installation options

Made to measure for different window types, offering a personalised solution.

Temperature control

Help maintain a comfortable temperature in the home.

Quality materials

Durable, high-quality, wear-resistant and easy-care fabrics, ideal for long-term use.

Variety of styles

Colours and textures complement both modern and classic interiors.

SHANGRI-LA

Shangri-La shades combine elegance and sophistication. Two layers of sheer and translucent fabric with adjustable horizontal vanes regulate daylight and maintain privacy. They enhance the room while controlling illumination, bringing contemporary style and exceptional comfort.

Transform your rooms with the distinctive appearance of Shangri-La shades and their combination of style and function.

LOHAS

Lohas shades combine the classic elegance of curtains with the practical, modern style of blinds. Their flowing waves provide a refined appearance. Sheer fabrics allow visibility when open and block light when closed, controlling privacy and illumination.

Available in many styles, colours and textures, these shades regulate indoor temperature and use high-quality, durable textiles for a long service life.

HONEY ESSENCE

Inspired by the precision of nature, Honey Essence has a distinctive honeycomb design that balances appearance and function. Its cellular structure allows airflow and provides thermal insulation, acoustic control and precise light management.

A discreet mounting system and manufacture in pieces up to 4.00 metres wide allow integration into large windows without visible joins or light leakage. Honey Essence offers energy savings, UV protection, privacy and acoustic comfort, complementing different decorative styles.

Balanced design. Comfort you can feel.

CARE AND CLEANING

 Clean with a slightly damp sponge or soft cloth.

 Do not iron.

 Do not use bleach or any type of soap.

**QUALITY STANDARDS
BEHIND OUR FABRICS**

OEKO-TEX®
CONFIDENCE IN TEXTILES
STANDARD 100

This certification verifies the safety of the materials and processes used to make our products, confirming the absence of substances harmful to consumer health. The OEKO-TEX label represents protection.

This voluntary certification programme verifies that textile raw materials meet strict safety standards and are free from harmful substances.

Choosing products with this certification gives you confidence that they were made to high safety standards.

TÜV certification, issued by one of the most rigorous organisations worldwide, verifies quality and safety in products, systems and technologies.

Through strict testing, certified products meet high standards and help prevent risks while protecting people and the environment.

MORE CONTROL, MORE COMFORT. WITHOUT EFFORT

Control light, privacy and
atmosphere with precision.

Automated FARZ shades combine advanced
technology and design to turn spaces into functional
sophisticated experiences.

FARZ quality and design now feature Somfy, a
leader in automation technology.

Move towards total comfort.

FARZ

Translation and specification notes

This English edition was prepared by HB Blinds from the supplied Spanish FARZ document. It is not an official English manufacturer publication. Photographs, model names, values and units are retained. Supplier performance and certification claims are translated, not independently verified. Confirm suitability, installation, current warranties and model-specific limits before ordering. The Spanish source remains available on the website.

Source inconsistency: the Honey Essence description mentions manufacture up to 4.00 m wide, while its maximum-dimensions box gives 3.00 m width and 3.50 m height. Both values have been retained. Confirm the limit for the selected fabric and system with FARZ.
